

Summary of the Workshop

December 14, 2000

Akimasa SUMI

ADEOS-II Program Scientist

EORC / NASDA, CCSR / Tokyo Univ.

Summary

- Very beneficial to all participants, because we could understand the present status and future plan of ADEOS-II, ALOS and GCOM and the present situation of participants to these satellite data.
- Expectation of countries to ADEOS-II and ALOS is high

Summary(2)

- Participants strongly realized that a timely distribution of satellite data is crucial for further development of the research and applications.
- Continuous distribution of information's about Japanese satellite programs is important and essential.

Summary(3)

- Data policy and information sharing system will be further discussed.
- Further collaboration is desirable.
- LET'S TRY TO GET FUND FROM OTHER SOURCES.
